### **DETAILED ACTION**

The amendment to the claims filed on May 1<sup>st</sup>, 2006 is acknowledged by the examiner.

#### ***Drawings***

The drawings are objected to because they fail to meet formal requirements as detailed in the attached Draftsperson's Drawing Review. They also are insufficient in the sense that details are not shown and that they are hand drawn. Because the device does not have a complex amount of components, a rejection under enablement will not be made. But for future applications, applicant should be aware that a fully detailed set of drawings is required.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner,

the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1 and 3 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

In regard to amended claim 1, the first addition of "one or more **rotating elements** disposed on casters" is claiming "rotating elements" attached to the casters. However, later in claim 1, applicant states "wherein each caster swivels about a vertical axis and **has a wheel** that rotates about a horizontal axis." Applicant has effectively claimed both rotating elements as well as wheels for casters. There is no support in the specification for such a combination.

This issue persists to claim 3 due to dependency. Claim 3 also additionally claims more rotatable elements even though it should refer back to the previously positively recited elements.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Fleischauer (US Patent 4,605,417).

Fleischauer discloses a device comprising: a first endplate (13) that can be attached to an upper vertebral body; a second endplate (14) that can also be attached to an upper vertebral body; a wheel (18) attached to casters (21, 26), and the wheel can rotate about a horizontal axis with the caster rotating about a vertical axis. Some of the elements of the device can be rotatable about axes orientated generally medial to lateral.

***Response to Arguments***

Applicant's arguments with respect to claims 1 and 3 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
